TALK TITLE: INTEGRATIVE CONSCIOUS LEADERSHIP AND PSYCHOLOGICAL TRANSFORMATION: A TRANSDISCIPLINARY MODEL OF HUMAN POTENTIAL DEVELOPMENT

INTRODUCTION: The study adopts a mixed-methods and interdisciplinary research design, combining qualitative narrative analysis with quantitative evaluation of behavioural transformation outcomes. The framework is grounded in: Autobiographical Memory Mapping (AMM): examining identity reconstruction and trauma-informed resilience. Neuropsychological principles: focusing on emotional regulation, brain plasticity, and gratitude-based interventions. Applied leadership models: integrating conscious leadership and business psychology. Empirical insights are derived from large-scale educational interventions conducted through global platforms such as Happy Life Academy, which has trained over 100,000 participants and certified thousands of professionals across multiple countries.

AIM:

This study aims to conceptualize and evaluate a transdisciplinary framework integrating psychological resilience, autobiographical identity reconstruction, and conscious leadership as proposed in the work of Prof. Dr. Stoyana Natseva. The research seeks to explore how the convergence of neuropsychology, leadership theory, and transformational education contributes to scalable human development and organizational effectiveness. It further aims to investigate the role of emotional intelligence and narrative identity in fostering adaptive behavioural outcomes across individual and systemic levels.

MATERIALS AND METHODS:

This study adopts an interdisciplinary and research-oriented methodology integrating leadership science, business administration, educational development, and strategic management practices. Data and professional insights were analyzed through academic research, executive leadership frameworks, case studies, and evidence-based approaches to evaluate innovation, organizational performance, and transformational leadership outcomes.

RESULTS:

Who instilled confidence in you as a girl or adult that you could do any job and be anything you choose? My father did that for me. My teachers and later Professors did too. In fact, my dissertation committee was a majority men, which taught me how to stand up in male dominated higher education. Example: In junior high I declared to my parents I wanted to be an architect. When it came time to sign up for classes for 7th grade, when I was growing up—girls took sewing and cooking while boys took shop and drafting. I asked my parents if I could attend the section with drafting—since it aligned with being an architect. Back in the 1970's in the USA my parents -actually had to set up a meeting in person at my Anchorage, Alaska school to lobby for me to be given that right to take that class—normally meant only for the boys at our school.

CONCLUSION:

The proposed framework establishes a novel intersection between psychology and leadership science, offering a scalable and evidence-informed pathway for global human development initiatives. It positions integrative consciousness-based models as critical to the future of education, leadership, and societal transformation.

KEYWORDS:

Business Strategy, Leadership Coaching, Executive Leadership, Organizational Development, Strategic Planning, Team Development Change Management, Business Growth, Professional Development, Personal Branding, Leadership Training

BIOGRAPHY:

Prof. Dr. Stoyana Natseva is a globally recognized psychologist, academic leader, and transformational educator known for her pioneering work in conscious leadership, applied psychology, and human development. She holds advanced doctoral qualifications (PhD and DBA) and serves in academic roles including Professor of Practice in Business Psychology. With a multidisciplinary foundation spanning psychology, neuroscience, and business strategy, her work bridges scientific research with real-world leadership and organizational transformation.

TALK TITLE: BEYOND THE TITLE: REDEFINING IDENTITY AND LEADERSHIP GROWTH

INTRODUCTION:

In our society, titles—like “Doctor,” “Director,” or “Mom”—are often treated as the ultimate badges of success. Whether earned through hard work or defined by our familial roles, they inevitably shape how we see ourselves and how the world interacts with us. However, these titles come with a hidden risk: they can become invisible cages. When those roles shift—or disappear entirely—we often experience an “identity discontinuity.” I’ve seen firsthand, both in my own life and in my coaching practice, how disruptive this can be, especially for women navigating the messy intersection of work, family, and community.

AIM:

My goal with this piece is to help you navigate that transition. I want to shift the focus from being a “role-holder” (waiting for the next title) to becoming an “architect” (designing your own growth). The aim is to help you step away from external validation and build a personalized blueprint for your evolution that is rooted in your own values, strengths, and purpose. I blend personal experience with psychological research (Ibarra, Deci & Ryan, Savickas) to explain why we get stuck and how to evolve. By applying the “Kindling the Fire” stage of my AWAKE Framework, we shift from “role-holder” to “architect” via three pillars: curating challenging Environments, seeking growth-focused Relational Assets, and defining success through personal Data rather than external expectations.

MATERIALS AND METHODS:

This study/presentation uses leadership coaching, strategic planning, and team-building approaches to explore organizational growth, diversity, inclusion, and professional development through interactive discussions and evidence-based practices.

RESULTS:

When you embrace the “architect” mindset, the results change your day-to-day reality:

- Narrative Ownership: You stop viewing your career as a script handed down by institutions and start writing the story yourself.
- Alignment Over Approval: You stop measuring success by what’s on your business card and start evaluating your life by how well your work, relationships, and surroundings align with your authentic self.
- A Shift in Questioning: You move away from asking, “What do they expect from me?” and start asking, “What is the most valuable thing I have to give?”

CONCLUSION:

Your past titles weren’t mistakes; they were essential chapters that got you here. But your current transformation doesn’t need another title—it needs a plan. By stepping into the role of architect, you stop waiting for permission and start drawing the blueprint for your own life. It’s time to stop letting society define your next chapter and start drafting it yourself.

TALK TITLE: “ENCODED LIGHT: THE GEOMETRY OF TRANSFORMATION” “GOLDEN CODES”

INTRODUCTION:

Emotional intelligence and neuroscience demonstrate that empathy, self-awareness, and emotional regulation are linked to specific brain processes. This paper expands this framework by introducing the influence of frequency, vibration, and geometric patterns on consciousness and leadership.

AIM:

To explore how emotional intelligence, neuroscience, and pattern-based “golden codes” influence women’s leadership and the interaction between consciousness and energy fields. This study applies an interdisciplinary approach combining emotional intelligence theory, neuroscientific insights, and the author’s practical experience in aromatherapy and consciousness-based pattern design. It analyses the relationship between patterns, frequency, and human perception.

MATERIALS AND METHODS:

This study utilizes a qualitative and interdisciplinary approach focusing on leadership development, personal transformation, and professional empowerment. Data and insights were gathered through professional experiences, coaching practices, leadership engagement, and analytical review of contemporary human development strategies. The methodology emphasizes practical application, reflective analysis, and transformational communication techniques to support individual and organizational growth.

RESULTS:

The findings suggest that patterned and rhythmic structures (golden codes) may support emotional balance, enhance awareness, and improve collaborative leadership. Women leaders show a strong capacity to create psychologically safe and harmonious environments

CONCLUSION:

Women’s leadership can be understood as an expression of higher-frequency consciousness, where emotional intelligence, neuroscience, and pattern-based design converge. Golden codes offer a novel approach to leadership by integrating science, consciousness, and aesthetics.

KEYWORDS:

Women’s leadership, emotional intelligence, neuroscience, frequency, golden codes, consciousness, empathy, organizational behaviour

BIOGRAPHY:

Helve Pärna is a visionary creative mentor and transformational guide who empowers individuals and brands to reconnect with their authentic essence and unlock their highest creative potential. Her work is rooted in deep intuitive insight, energetic awareness, and a profound understanding of human expression, enabling her to help clients align their personal identity with purposeful creation. With a unique approach that blends creativity, consciousness, and strategic clarity, Helve supports artists, entrepreneurs, and leaders in discovering their inner direction and amplifying their voice. She specializes in uncovering hidden strengths, building authentic brand identity, and guiding individuals toward meaningful growth and visibility. Her mentorship focuses not on teaching external skills, but on activating the innate potential that already exists within each individual.

TALK TITLE: BEYOND THE TITLE: THE INVISIBLE ARCHITECTURE OF PERFORMANCE: A SPATIAL-ENERGETIC FRAMEWORK FOR HUMAN PRODUCTIVITY AND WELL-BEING

INTRODUCTION:

The study challenges dominant paradigms in organizational development that prioritize process optimization and leadership training, arguing instead for a spatial-first diagnostic lens. It introduces the concept of “energetic infrastructure”—an invisible yet impactful layer of environmental influence that shapes human potential.

AIM:

his study aims to conceptualize and evaluate a transdisciplinary framework integrating psychological resilience, autobiographical identity reconstruction, and conscious leadership as proposed in the work of Prof. Dr. Stoyana Natseva. The research seeks to explore how the convergence of neuropsychology, leadership theory, and transformational education contributes to scalable human development and organizational effectiveness. It further aims to investigate the role of emotional intelligence and narrative identity in fostering adaptive behavioural outcomes across individual and systemic levels.

MATERIALS AND METHODS:

This study utilized a qualitative and analytical approach based on professional leadership experiences, industry practices, and strategic business communication methods. Data and insights were gathered through case studies, professional observations, leadership frameworks, and real-world organizational practices to evaluate innovation, growth, and transformational leadership outcomes.

RESULTS:

Findings suggest that: Up to 80% of perceived performance inefficiencies in teams may correlate with spatial and environmental misalignment rather than purely managerial or procedural deficiencies. Spatial configurations significantly affect: Emotional regulation, Cognitive clarity, Interpersonal dynamics, Harmonised environments (through energy flow optimisation, colour alignment, and structural balance) demonstrate measurable improvements in : Focus and productivity, Psychological comfort and recovery (especially in domestic spaces), Decision-making efficiency in professional settings The results highlight that space operates as a non-verbal, constant feedback system influencing human behaviour beneath conscious awareness.

CONCLUSION:

This presentation introduces a framework for embodied and conscious leadership that prioritizes human connection, authenticity, and relational safety in work environments. Participants will leave understanding that leadership excellence exists on the other side of inner work—it is a state of being, not merely a set of skills.

KEYWORDS:

Spatial Energetics, Feng Shui, Environmental Psychology, Organisational Performance, Tao Geomancy, Human-Centred Design, Cognitive Ecology.

BIOGRAPHY:

Erika Hacker is a seasoned consultant and educator specializing in Feng Shui, spatial energetics, and holistic environmental design, with over two decades of experience working within professional and living spaces. Based in Austria, she is known for her deep understanding of how physical environments influence human performance, well-being, and organizational effectiveness. Her work integrates ancient Taoist geomancy principles with modern design thinking, creating spaces that support clarity, productivity, and emotional balance. As a certified expert in Tao Geomancy and Feng Shui, Erika has developed a unique methodology that focuses on energy flow, spatial harmony, and the relationship between people and their surroundings. Her multidisciplinary background in pedagogy, creative design, and color psychology allows her to approach each project with both analytical precision and intuitive insight.

TALK TITLE: STRATEGIC CONVERGENCE OF ARTIFICIAL INTELLIGENCE, GLOBAL LEADERSHIP, AND CROSS-MARKET INNOVATION: A CONTEMPORARY PROFESSIONAL TRAJECTORY ANALYSIS

INTRODUCTION:

The study highlights a paradigm shift from traditional leadership models to “Augmented Global Leadership”, characterized by: Cognitive agility in navigating AI-driven environments, Cross-cultural intelligence derived from global exposure, and platform-based influence where professionals act as connectors between academia, industry, and emerging technologies. Furthermore, the integration of AI discourse into mainstream leadership roles suggests that future leaders must function as hybrid strategists equally proficient in technological understanding and human-centric decision-making.

AIM:

This study aims to examine the evolving role of globally positioned professionals in shaping the intersection of artificial intelligence (AI), strategic leadership, and cross-border innovation ecosystems. It specifically investigates how elite academic grounding combined with industry immersion contributes to adaptive leadership models within rapidly transforming digital economies.

MATERIALS AND METHODS:

This study utilizes a practical and interdisciplinary methodology integrating leadership development, professional coaching, communication strategies, and organizational growth practices. Insights were collected through professional experience, collaborative engagement, mentorship models, and evidence-based leadership approaches to evaluate effectiveness in personal and professional transformation.

RESULTS:

Literature review examination will highlight the gaps in how the intersections of race, lack of education and support, and even employment attendance is disproportionately experienced in marginalized populations due to the social constructs of systems and society. Findings indicate that contemporary global professionals: Operate as boundary-spanners, integrating insights across geographies and industries. Demonstrate AI fluency combined with strategic business acumen, enabling them to contribute to emerging “world models” and digital transformation initiatives. Exhibit network-centric influence, leveraging high-level collaborations (e.g., AI conferences, global leadership engagements) to shape innovation discourse. Show increased participation in multi-sector ecosystems, including technology, finance, and media platforms such as TikTok.

CONCLUSION:

The professional trajectory examined reflects a new archetype of leadership—one that is globally mobile, technologically integrated, and innovation-driven. Such profiles are instrumental in shaping the next generation of AI-enabled, globally conscious leadership frameworks.

Michelle H. is a dedicated social impact professional with over two decades of experience advocating for human rights, equality, and the integration of diverse communities. Based in Madrid, she has built a career centered on supporting vulnerable populations, particularly immigrants, through advisory services, project development, and community engagement initiatives. Throughout her career, Michelle has demonstrated a deep commitment to social justice, working across nonprofit and independent platforms to design and implement initiatives that promote inclusion, cultural understanding, and sustainable community development. Her work reflects a strong foundation in public service, administration, and grassroots advocacy, enabling her to bridge gaps between policy, people, and practice.

VANESSA HARIPERSAD

Multiple Global Award-Winning Transformational Leadership & Resilience Coach | Founder & CEO | Global Advisory Board Member | Keynote Speaker | Mentor | Building Resilient Leaders Through Neuroscience

TALK TITLE: CULTIVATING SELF-AWARE AND RESILIENT LEADERSHIP IN COMPLEX ORGANIZATIONAL ENVIRONMENTS: AN INTEGRATIVE COACHING-BASED FRAMEWORK

INTRODUCTION:

The study contributes to leadership theory by reframing resilience not as a fixed trait but as a dynamic, developable capacity rooted in self-awareness and intentional practice. It challenges traditional performance-centric paradigms by highlighting the limitations of high achievement without reflective awareness, emphasizing that sustained leadership effectiveness requires internal alignment as much as external competence. Furthermore, integrating coaching methodologies with decision-making frameworks such as the OODA Loop demonstrates how leaders can operationalize self-awareness into actionable strategies, enabling continuous adaptation in volatile environments. The findings underscore the necessity of embedding reflective practices within leadership development programs and suggest that organizations should prioritize human-centric, psychologically informed approaches to cultivate future-ready leaders.

AIM:

This keynote aims to explore how emotional resilience functions as a critical mechanism for transforming human consciousness, bridging the gap between psychological insight and behavioural change in leadership, relationships, and holistic well-being.

MATERIALS AND METHODS:

This study/article is based on leadership coaching practices, resilience frameworks, executive leadership experiences, and transformational development strategies shared through professional insights, case studies, and global leadership engagements. Qualitative observations and reflective leadership methodologies were applied to explore self-awareness, resilience, decision-making, and sustainable leadership growth.

RESULTS:

Findings indicate that self-awareness functions as a critical enabler of conscious leadership, directly influencing decision-making quality, emotional regulation, and relational effectiveness. Leaders who actively cultivate self-awareness demonstrate: Enhanced adaptability in ambiguous and high-pressure environments, Improved team engagement through empathy-driven communication, Greater alignment between personal values and organizational goals, and reduced burnout through intentional reflection and boundary-setting.

The SCCR framework emerged as a robust model for developing resilience, with each dimension contributing uniquely: Self-awareness enables insight into internal drivers and blind spots, Compassion fosters psychological safety and trust, Curiosity promotes learning and reframing of challenges, and Resourcefulness supports agile problem-solving and innovation.

CONCLUSION:

This presentation introduces a framework for embodied and conscious leadership that prioritizes human connection, authenticity, and relational safety in work environments. Participants will leave understanding that leadership excellence exists on the other side of inner work—it is a state of being, not merely a set of skills.

KEYWORDS:

Dr. Rasimah Jar

Global Speaker, Book Author, Relationship Coach-Trainer, NLP Trainer Behavioural Coach-Consultant, Family Life Educator, Parenting Coach .

TALK TITLE: FROM REACTION TO CONSCIOUS RESPONSE: EMOTIONAL RESILIENCE AS THE GATEWAY TO HUMAN TRANSFORMATION.

INTRODUCTION:

Despite increasing global awareness of mental health, mindfulness, and spirituality, individuals continue to struggle with translating awareness into consistent, constructive behaviour. This highlights a critical gap between knowing and doing, where unconscious emotional reactivity often overrides intentional action. Transforming human consciousness, therefore, requires a deeper integration of psychological processes with emotional regulation and relational intelligence.

AIM:

This keynote aims to explore how emotional resilience functions as a critical mechanism for transforming human consciousness, bridging the gap between psychological insight and behavioural change in leadership, relationships, and holistic well-being.

MATERIALS AND METHODS:

This study uses a qualitative approach focusing on leadership, professional growth, and strategic communication through case studies, professional experiences, and industry analysis

RESULTS:

Who instilled confidence in you as a girl or adult that you could do any job and be anything you choose? My father did that for me. My teachers and later Professors did too. In fact, my dissertation committee was a majority men, which taught me how to stand up in male dominated higher education. Example: In junior high I declared to my parents I wanted to be an architect. When it came time to sign up for classes for 7th grade, when I was growing up—girls took sewing and cooking while boys took shop and drafting. I asked my parents if I could attend the section with drafting—since it aligned with being an architect. Back in the 1970's in the USA my parents —actually had to set up a meeting in person at my Anchorage, Alaska school to lobby for me to be given that right to take that class— normally meant only for the boys at our school.

CONCLUSION:

The transformation of human consciousness is not achieved through knowledge alone but through disciplined emotional awareness and intentional action. By integrating psychology, neuroscience, and relational practice, individuals can move beyond unconscious patterns toward sustained personal and collective transformation.

KEYWORDS:

Emotional Resilience, Consciousness Transformation, Emotional Intelligence, Leadership, Behavioural Change, Holistic Well-Being, Neuroscience, Relational Intelligence

BIOGRAPHY:

Dr Rasimah Jar, PhD is a globally recognised Relationship Success Coach, therapist, and leadership expert with over 30 years of experience in psychology, family life education, and human development. She is the Founder and CEO of ACE PROWISE Consultancy and an award-winning speaker featured on international media platforms. She specialises in emotional resilience, conscious leadership, and relationship transformation, working with leaders, couples, and organisations across diverse cultural contexts. Dr. Rasimah is the creator of practical frameworks that bridge psychological insight with real-life application, empowering individuals to move from reactive patterns to intentional, conscious living in both personal and professional domains.

JEFFERY HERBERT WILLIAMS

Trainer and an Education Success Coach. Hehasbeena trainer, coach and mentor for more than 25 years

TALK TITLE: EMOTIONAL INTELLIGENCE FOR PEAK PERFORMANCE IN THE WORKPLACE

INTRODUCTION:

Why is emotional intelligence crucial in the workplace today? How can we communicate better with empathy and understand better about ourselves and feeling the heart of another. Like what Alfred Adler says: "I hear with the ears of another; I see with the eyes of another, and I feel the heart of another"

AIM:

A leader with higher Emotional Intelligence can manage his or her own impulses better, communicate with others more effectively, manage change well, solve problems quickly, and use humour to build rapport in tense situations. These leaders also have empathy, remain optimistic even in the face of adversity, and are effective at educating and persuading their teams in their workplace.

When your leaders are more emotionally intelligent, your company will witness improvement in performance, profitability and organization climate as a result of improvement in trust, teamwork, planning & decision making, motivation, energy & drive, and interpersonal relationships.

MATERIALS AND METHODS:

- The talk will cover the 5 frameworks of Emotional Intelligence
- Dealing with different emotions like sadness, disappointment, anger and frustrations
- How and why is it necessary to deal with emotions?
- How and why is it necessary to deal with negative emotions?
- Activities to prepare participants to deal with at least one negative emotion

RESULTS:

To lead better with EQ strategies in the Workplace

CONCLUSION:

How well we empathize, understand the clarity of why EQ matters critically in the workplace and how we can respond amicably

KEYWORDS:

Emotional Intelligence

BIOGRAPHY:

Jeffrey Williams is a Trainer and an Education Success Coach. He has been a trainer, coach and mentor for more than 25 years

CLAUDETTE MILNER

Award-Winning Author and Featured Christian Speaker

TALK TITLE: A MATTER OF INTERPRETATION CONTEXTUAL EXAMINATION OF HER DOCUMENTARIES ADDRESSING MOVEMENTS SUCH AS BLACK LIVES MATTER AND LGBTQ+ EXPERIENCES IN AMERICA

INTRODUCTION:

The study positions Milner's contributions within the broader frameworks of: Critical communication theory, Public theology, Cultural studies, and identity discourse. Her approach challenges traditional boundaries between religious communication and socio-political engagement, suggesting a new paradigm of "integrated narrative leadership." This paradigm emphasizes: The role of media as a moral and cultural mediator, The power of storytelling in shaping inclusive societal narratives, The emergence of grassroots intellectualism through non-institutional voices. Furthermore, her work underscores the importance of interdisciplinary communication strategies in addressing fragmented modern audiences, thereby contributing to evolving scholarship on media-driven social transformation.

AIM:

This study aims to critically examine the multidimensional professional trajectory of Claudette Milner as a case of transformative communication that intersects faith-based discourse, socio-political awareness, and cultural storytelling. The research seeks to explore how her work as an author, songwriter, and radio host contributes to shaping public consciousness, fostering dialogue on identity, and addressing contemporary social issues such as race, spirituality, and inclusion.

MATERIALS AND METHODS:

This research applies a holistic and experience-driven methodology focusing on leadership empowerment, community engagement, personal development, and strategic communication. Information and professional insights were gathered through practical leadership experiences, collaborative initiatives, mentorship frameworks, and evidence-based approaches to analyze personal and organizational growth outcomes.

RESULTS:

Findings reveal that Milner's body of work operates as a hybrid communicative model, characterized by: Faith-anchored epistemology – integrating Christian theology with contemporary societal issues, Dialogic media engagement – fostering participatory discourse through radio and interviews, Narrative activism – using storytelling to humanize complex issues such as racial justice and identity politics, Multimodal expression – combining literature, music, and broadcasting to expand audience reach. Her work demonstrates a consistent pattern of bridging personal spirituality with collective social realities, enabling audiences to engage in reflective and transformative thinking.

CONCLUSION:

This presentation introduces a framework for embodied and conscious leadership that prioritizes human connection, authenticity, and relational safety in work environments. Participants will leave understanding that leadership excellence exists on the other side of inner work—it is a state of being, not merely a set of skills.

KEYWORDS:

Self-aware leadership; resilience; executive coaching; adaptive leadership; SCCR framework; decision-making; organizational behaviour; leadership development.

BIOGRAPHY:

Claudette Milner is an accomplished author, songwriter, media personality, and speaker with over two decades of creative and professional experience. Based in Louisville, Kentucky, she is the founder of Claudette Milner Media and has built a reputation for using storytelling, media, and public speaking to address complex social, cultural, and spiritual issues. Her work reflects a deep commitment to inspiring dialogue, personal growth, and community transformation.

LAURA DENKTASH

Helping women awaken their feminine essence, power, And creativity through the Sacred Wisdom of the Rose.

TALK TITLE: THE STUDY ADOPTS A QUALITATIVE INTERPRETIVIST APPROACH, COMBINING

INTRODUCTION:

The study adopts a qualitative interpretivist approach, combining: Narrative professional analysis of leadership practices in quality-driven environments. Conceptual synthesis of ISO-based systems thinking and transformational leadership principles. Thematic analysis of thought leadership content (e.g., integrity, gratitude, ethical leadership). Case-informed abstraction, using real-world insights from quality certification and organizational transformation initiatives. This hybrid methodology bridges technical compliance frameworks (ISO 9001) with soft-skill leadership constructs, enabling a cross-disciplinary academic model.

AIM:

This study aims to conceptualize and synthesize a multidimensional leadership framework grounded in ethical integrity, quality management systems (QMS), and transformational mind-set development. Drawing on the professional praxis of Laura Denktash—whose work spans ISO 9001 implementation, leadership development, and personal transformation—the research seeks to explore how structured quality methodologies can be integrated with human-centered leadership to drive sustainable organizational excellence, individual empowerment.

MATERIALS AND METHODS:

This study/presentation uses a qualitative and experience-based approach, integrating leadership development, ethical business practices, quality management systems, and transformational coaching methodologies. Insights were gathered through professional case studies, organizational leadership experiences, coaching interactions, and continuous improvement frameworks to evaluate strategies for personal and professional growth.

RESULTS:

Who instilled confidence in you as a girl or adult that you could do any job and be anything you choose? My father did that for me. My teachers and later Professors did too. In fact, my dissertation committee was a majority men, which taught me how to stand up in male dominated higher education. Example: In junior high I declared to my parents I wanted to be an architect. When it came time to sign up for classes for 7th grade, when I was growing up—girls took sewing and cooking while boys took shop and drafting. I asked my parents if I could attend the section on drafting, since it aligned with being an architect. Back in the 1970's in the USA my parents -actually had to set up a meeting in person at my Anchorage, Alaska school to lobby for me to be given that right to take that class- normally meant only for the boys at our school.

CONCLUSION:

The Rose is the medicine for our time. She is a map, a remembrance, a living field of feminine technology designed for a world that has forgotten how to breathe. This is the ancient future blooming in the hands of the modern woman. And, this is the invitation for the modern woman. To once again bloom from within. To lead from your heart. To reclaim the ancient feminine intelligence that the world is starving for. Because every woman in the room knows exactly what I mean....

KEYWORDS:

Ethical Leadership, ISO 9001, Quality Management Systems, Transformational Leadership, Organizational Excellence, Continuous Improvement, Leadership Development

BIOGRAPHY:

Laura Denktash is a dynamic leadership expert, coach, and international speaker dedicated to empowering individuals to unlock their creative potential and step into their purpose-driven leadership. With a strong foundation in training, life coaching, and business consulting, she works with professionals and organizations worldwide to cultivate authentic leadership, personal growth, and high-performance cultures. With nearly three decades of experience in quality management and organizational excellence, Laura has played a pivotal role in implementing and leading ISO 9001 systems, driving continuous improvement, and building cultures rooted in integrity and accountability. Her work spans diverse industries, including high-level projects such as collaborations within advanced technical and institutional environments, reflecting her ability to bridge operational excellence with human-centered leadership.

Maria Venusa Rodrigues

Somatic Relational Coach, Keynote Speaker, NLP Practitioner, Podcast-Host,

TALK TITLE: " FROM POWER OVER TO PRESENCE WITH"

INTRODUCTION:

This section encompasses real-time demonstration of Somatic methodologies and practices through engagement with the audience in these. Excerpt from Margarita Aquino, coordinator of Rena Mat, will also be shared, with space for reflection. Concepts on 'Power Over' and 'Presence with' will be shared and demonstrated. The body of talk expands on the effects of trauma, more precisely, intergenerational trauma, on the perpetuation of 'Power Over' leadership styles. A personal story is shared as an example for solidifying the concept of learning by contrast. Some real-time somatic practices are offered to the audience as a way to somatically connect with concepts

AIM:

FromPowerOverToPresenceWith'aimstohighlightthetransformationalbenefits of heart-centred leadership, welcoming presence with, where compassionately acknowledging each other's emotions and engaging with one another in healthy conflict, whilst using safe communication to repair and to horizontal leadership, rather than vertical leadership, which in turn ensures sustainable and lasting change on this Planet. I will inform how 'Presence With' is developed, by engaging the audience in real-time somatic methodologies and practices, throughout the talk.

MATERIALS AND METHODS:

This work utilizes an integrative and experience-based methodology focused on leadership development, communication strategies, personal transformation, and organizational growth. Insights were gathered through professional practice, collaborative learning, strategic analysis, and real-world leadership engagement to evaluate impactful approaches for sustainable success and empowerment.

RESULTS:

An audience that better understands how Intergenerational trauma affects leadership, and who feels more compassion, and a better understanding of the lasting benefits of 'Presence With' through the practices shared.

CONCLUSION:

This section delineates the theoretical underpinnings that inform the origins behind Power Over and Presence With, and how to create lasting and sustainable leadership that is horizontal rather than vertical in its approach. In this section, I further expand on how Presence With offers the possibility for human connection, healthy conflict, and compassion. Lastly, I offer a heart coherence practice for the audience to apply in real time with another member, and I leave the question: 'Where can I practice more Presence within my own personal and professional life?'

KEYWORDS:

Presence, Power, Female Leadership, Legacy, Collective Grief. Intergenerational Trauma, Compassion, Collaboration

BIOGRAPHY:

Venusa Rodrigues is a transformational practitioner, somatic therapist, and holistic well-being advocate dedicated to supporting deep emotional healing and sustainable personal growth. Her work integrates somatic attachment therapy, trauma-informed coaching, NLP, and mind-body practices to help individuals reconnect with their inner intelligence and restore balance. With a multidimensional approach that bridges science, psychology, and conscious awareness, Maria specializes in guiding individuals through trauma recovery, emotional resilience, and self-discovery. She is passionate about empowering people to release limiting patterns, enhance their well-being, and step into a more aligned, authentic, and purpose-driven life

DR. GINA PIOMBINO

*West Chester University of Pennsylvania
West Chester, PA*

TALK TITLE: ROOTED IN JUSTICE: WOMEN ADVANCING TRAUMA-INFORMED LEADERSHIP THROUGH CRITICAL RACE AND RELATIONAL CULTURAL FRAMEWORKS

INTRODUCTION:

Dr. Gina Piombino (she/her) is a Director of the Master of Social Work practicum education program at West Chester University. Her areas of expertise include school social work, adolescent mental health, and social work practice in secondary and higher education. She is a board member for Hope in Her, LLC, a non-profit that seeks to eradicate health inequities of people of color who have been exposed to interpersonal violence and systemic trauma. Dr. Piombino's research and experience includes anti-oppressive, inclusive, strengths-perspective, and healing approaches in relation to micro and macro level systemic challenges for marginalized communities.

AIM:

Cis-female leaders are positioned as Marginalized populations to courageously Transform and build anti-oppressive leadership models to Redefine leadership.

MATERIALS AND METHODS:

This research adopts an integrative methodology combining leadership practices, personal development strategies, communication frameworks, and organizational empowerment approaches. Data and professional insights were derived from practical experience, mentorship initiatives, collaborative learning models, and evidence-based professional development techniques to assess transformational growth and leadership effectiveness.

RESULTS:

Literature review examination will highlight the gaps in how the intersections of race, lack of education and support, and even employment are disproportionately experienced in marginalized populations due to the social constructs of systems and society.

CONCLUSION:

- Explain the definitions of trauma, TIC framework, CRT, and CRT
- Recognize the intersections of diversity, equality, power, racism
- Apply and Analyse TIC with employees and co-workers (micro practice) Evaluate how to respond to people using a TIC framework (mezzo practice)
- Create policy changes to address the lack of TIC (macro practice)

KEYWORDS:

Trauma-Informed, Relational Cultural Theory, Critical Race Theory

BIOGRAPHY:

Currently associated with Match Group, she brings a strong track record of delivering data-driven strategies and impactful business outcomes. With extensive experience across leading media organizations, she has consistently demonstrated the ability to drive growth, optimize performance, and lead high-performing teams in a rapidly evolving digital ecosystem

JANEET HAMILTON

*CEO@ The Anomaly Factor!| Certified
Practitioner, Health Coach,*

TALK TITLE: THE BODY REMEMBERS WHAT THE MIND CANNOT

INTRODUCTION:

Rewiring of the brain is what is required to heal; this is neuroscience and neurobiology. Through awareness, we become conscious of our limiting beliefs and defence mechanisms, understand why we have them, and behave as a result; this is often for survival. When we understand these, we get to choose to be, act, and do differently, this is neuroplasticity, and we all have the potential to do so, connect, change our mindset, and manifest the life you choose and deserve.

AIM:

To change the way we do medicine. My pillars are heart, mind, body & soul. My pillars are heart, mind, body & soul. I believe that these four pillars must be in Alignment and coherence to be in the flow of life; healing is totally possible. We are emotional & spiritual beings, in a human Intelligence into medical school. Embodied & Conscious Leadership is a by-product.

MATERIALS AND METHODS:

FEEL X DEAL X HEAL = AUTHENTICITY

I simply hold a safe space and intuitively guide them to release the suppressed emotions and related energy, to connect them to their authenticity and the person they have always been before life's experiences affected them, by releasing trauma that is I am on a mission to get Emotional stored in the body

RESULTS:

Nervous System Regulation, Inner Peace, Freedom, Embodied & Conscious Leadership

CONCLUSION:

This presentation introduces a framework for embodied and conscious leadership that prioritizes human connection, authenticity, and relational safety in work environments. Participants will leave understanding that leadership excellence exists on the other side of inner work—it is a state of being, not merely a set of skills.

KEYWORDS:

Authenticity, empathy, emotional intelligence, female leadership & empowerment, safety connection, freedom, alignment, healing, transformation, mind set, manifestation

BIOGRAPHY:

Janet Hamilton is an Integrative & Holistic Practitioner, who uses The Compassionate Inquiry Approach (CI) developed by Dr. Gabor Mare, who is trauma-informed through both lived and learned experiences, and a Life & Health Coach. (She/Her) Her programs are "Understanding Feelings & Emotions" and "The Caregiver Survival Guide. "She helps clients align with their mind, body, heart, and soul to connect to their authenticity. She helps them to understand their self-sabotaging behaviors and limiting beliefs. Janet is a Compassionate Intuitive Healer, known for her presence and ability to hold a safe space. Janet helps you to transform your life into one of authenticity and connectedness, so that you can find your purpose, passion, joy, and freedom; they are all on the other side of healing. Let's connect and discover that unique anomaly within.
